

COPPER GROUND STRAP

Grounding Straps for Metal Pipes or Metal Electrical Conduit

DESCRIPTION

Quick and easy grounding for antenna installation is provided by this device. Wrap the appropriate model strap around an electrically grounded water pipe or metal conduit and tighten the machine screw to snug the strap. Then wrap your antenna ground wire around the machine screw and tighten the compression nut against the ground wire.

FEATURES

- UL approved ground strap
- Two different models accommodate a wide variety of pipe diameters
- Strap body is solid copper, the threaded machine screw and nut assembly is copper plated steel

MECHANICAL CHARACTERISTICS

- The A246UL strap measures 0.5" wide by 6.5" long
- Accommodates pipe ODs from 1.0" minimum to 1.75" maximum
- Approximately 0.020" thick
